Because “YOU” deserve the BEST!

Education is a legacy that we would like to pass on to our children. It starts from family then to the formal learning institutions of our society. But, education should not be limited to the four walls of classroom. We believe that learning must go beyond the campuses of schools.

In this regard, we would like to be your partners in attaining the goals to integrate with the students have learned in schools with places and events that will provide them skills and knowledge they need.

Let us assist you in creating a most ideal educational tour that will allow the children to experience a new treat of knowledge outside the classroom by visiting our historical landmarks, enviable tourist spots and rediscover wildlife. As well as familiarize themselves at an early age the excitement and amusing country’s heritage like theme parks, museums and shrines. Be delighted in a breathtaking ride-all-you-can magnificent amusement center and be astound with the theatrical or puppetry show with values oriented stories shown in a well maintained theater.

Using our programs is another great approach for students to make connections to the real world. We will guarantee that this experience be a one to remember.

Construction of the present church was started in 1856 which was supervised by an architect, Lucina Oliver. It was once noted to be the biggest church in the whole of East Asia.

The church is unique in the sense that it combines patriotic, religious and artistic influences. Writers point to its "theatrical exuberance". Its facade is Baroque and consists of a single mass of stone shaped into rich and complex designs. The church, however is a fusion of styles with arched openings, alternating segmental canopies and arches of asymmetric shapes.
